Davis Advisors is committed to communicating with our investment partners as candidly as possible because we believe our investors benefit from understanding our investment philosophy and approach. Our views and opinions regarding the investment prospects of our portfolio holdings and Composite include "forward-looking statements" which may or may not be accurate over the long term. Forward-looking statements can be identified by words like "believe," "expect," "anticipate," or similar expressions when discussing prospects for particular portfolio holdings and/or the Composite. You should not place undue reliance on forward-looking statements, which are current as of the date of this report. We disclaim any obligation to update or alter any forward-looking statements, whether as a result of new information, future events, or otherwise. While we believe we have a reasonable basis for our appraisals and we have confidence in our opinions, actual results may differ materially from those we anticipate.

Returns from inception (4/1/69) through 12/31/01, were calculated from the Davis Large Cap Value Composite (see description below). Returns from 1/1/02, through the date of this report were calculated from the Large Cap Value SMA Composite.

Davis Advisors' Large Cap Value Composite includes all actual, fee-paying, discretionary Large Cap Value investing style institutional accounts, mutual funds, and wrap accounts under management including those accounts no longer managed. Effective 1/1/98, a minimum account size of \$3,500,000 was established. Accounts below this minimum are deemed not to be representative of the Composite's intended strategy and as such are not included in the Composite. A time-weighted internal rate of return formula is used to calculate performance for the accounts included in the Composite.

Davis Advisors' Large Cap Value (SMA) Composite excludes institutional accounts and mutual funds. Performance shown from 1/1/02, through 12/31/10, includes all eligible wrap accounts with a minimum account size of \$3,500,000 from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. For the performance shown from 1/1/11, through the date of this report, the Davis Advisors' Large Cap Value SMA Composite includes all eligible wrap accounts with no account minimum from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. The net of fees rate of return formula used by the wrap-fee style accounts is calculated based on a 3% maximum wrap fee charged by the wrap account sponsor for all account service, including advisory fees for the period 1/1/06, and thereafter. For the gross performance results, custodian fees and advisory fees are treated as cash withdrawals. A list of Davis Advisors' Composites is available upon request.

The investment objective of a Davis Large Cap Value account is long-term growth of capital. There can be no assurance that Davis will achieve its objective. Davis Large Cap Value accounts invest primarily in common stock of large companies with market capitalizations of at least \$10 billion. The principal risks are: common stock risk, depositary receipts risk, emerging markets risk, fees and expenses risk; financial services risk, foreign country risk, foreign currency risk, headline risk, large capitalization companies risk, manager risk, mid- and small-capitalization companies risk, and stock market risk. See the ADV Part 2 for a description of these principal risks.

Forward Price/Earnings (Forward P/E) Ratio is a stock's current price divided by the company's forecasted earnings for the following 12 months. The values for the portfolio and index are the weighted average of the P/E ratios of the stocks in the portfolio or index.

Five-Year EPS Growth Rate is the average annualized earning per share growth for a company over the past five years. The values for the portfolio and index are the weighted average of the five-year EPS Growth Rates of the stocks in the portfolio or index.

Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index.

The model account generally uses Global Industry Classification Standard ("GICS") as developed by Morgan Stanley Capital International and Standard and Poor's Corporation to determine industry classification. GICS presents industry classification as a series of levels (i.e. sector, industry group, industry, and sub-industry).

Data provided herein and references to portfolio herein is representative of a model account. Data provided is as of the date indicated and is subject to change. This material should not be considered a recommendation to buy, sell or hold any of the securities mentioned. We gather our index data from a combination of reputable sources, including, but not limited to, Thomson Financial, Wilshire Atlas, Lipper, and index websites.

The S&P 500 Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. The index is adjusted for dividends, weighted towards stocks with large market capitalizations and represents approximately two-thirds of the total market value of all domestic common stocks. Investments cannot be made directly in an index.

After 10/31/22, this material must be accompanied by a supplement containing performance data for most recent quarter end.
