The performance presented represents past performance and is not a guarantee of future results. Total return assumes reinvestment of dividends. Investment return and principal value will vary so that an investor may lose money. For current, quarterly returns, please ask your financial advisor to contact Davis Advisors. Current performance may be higher or lower.

The investment strategies described herein are those of Davis Advisors. These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. For additional information, documents and/or materials, please speak to your Financial Advisor.

1. The Attractive Growth and Undervalued reference in this piece relates to underlying characteristics of the portfolio holdings. There is no guarantee that the portfolio performance will be positive as equity markets are volatile and an investor may lose money. **Past performance is not a guarantee of future returns.** Five-year EPS Growth Rate (5-year EPS) is the average annualized earnings per share growth for a company over the past 5 years. The values shown are the weighted average of the 5-year EPS of the stocks in the portfolio or index. Approximately 10.80% of the assets of the Portfolio are not accounted for in the calculation of 5-year EPS as relevant information on certain companies is not available to the data provider. Forward Price/Earnings (Forward P/E) Ratio is a stock's price at the date indicated divided by the company's forecasted earnings for the following 12 months based on estimates provided by the data provider. These values for both the portfolio and the index are the weighted average of the stocks in the portfolio or index.

This material may be shared with existing and potential clients to provide information concerning market conditions and the investment strategies and techniques used by Davis Advisors to manage its client accounts. Please refer to Davis Advisors Form ADV Part 2 for more information regarding investment strategies, risks, fees, and expenses. Clients should also review other relevant material, including a schedule of investments listing securities held in their account.

Effective 9/23/14, Davis Advisors created a Global Equity SMA Composite which excludes the institutional accounts and mutual funds. Performance shown from 10/1/14, through the date of this report, the Davis Advisors' Global Equity SMA Composite includes all eligible wrap accounts with no account minimum from inception date for

the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing.

A time-weighted internal rate of return formula is used to calculate performance for the accounts included in the Composite. The net of fees rate of return formula is calculated based on a hypothetical 3% maximum wrap fee charged by the wrap account sponsor for all account services. For the gross performance results, custodian fees and advisory fees are treated as cash withdrawals.

Davis Advisors is committed to communicating with our investment partners as candidly as possible because we believe our clients benefit from understanding our investment philosophy and approach. Our views and opinions include "forward-looking statements" which may or may not be accurate over the long term. Forward-looking statements can be identified by words like "believe," "expect," "anticipate," or similar expressions. You should not place undue reliance on forward-looking statements, which are current as of the date of this report. We disclaim any obligation to update or alter any forward-looking statements, whether as a result of new information, future events, or otherwise. While we believe we have a reasonable basis for our appraisals and we have confidence in our opinions, actual results may differ materially from those we anticipate.

The investment objective of a Davis Global Equity account is long-term growth of capital. There can be no assurance that Davis will achieve its objective. The principal risks are: common stock risk, depository receipts risk, emerging market risk, fees and expenses risk; foreign country risk, foreign currency risk, headline risk, large-capitalization companies risk, manager risk, mid- and small-

capitalization companies risk, and stock market risk. See the ADV Part 2 for a description of these principal risks.

Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index.

The model account generally uses Global Industry Classification Standard ("GICS") as developed by Morgan Stanley Capital International and Standard & Poor's Corporation to determine industry classification. GICS presents industry classification as a series of levels (i.e., sector, industry group, industry, and sub-industry).

Data provided herein is representative of a model account. Data provided is as of the date indicated and is subject to change. This material should not be considered a recommendation to buy, sell or hold any of the securities mentioned.

We gather our index data from a combination of reputable sources, including, but not limited to, Lipper, Wilshire, and index websites.

The MSCI ACWI (All Country World Index) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets throughout the world. The Index includes reinvestment of dividends, net foreign withholding taxes. Investments cannot be made directly in an index.

After 7/31/23, this material must be accompanied by a supplement containing performance data for the most recent quarter end.
